JOB POSITION: JUNIOR WEB DEVELOPER

Dear Hiring Manager:

My name is **Sreyneang Loeun**, a second-year Web Development student at Passerelles numériques Cambodia (PNC), currently working toward an associate degree. I am eager to apply for **Junior Back- End Developer** at **AEON Specialized Bank**. With a solid foundation of both frontend and backend development and a deep enthusiasm for building effective digital solutions, I am confident that I can make a valuable contribution to your development team.

I have experience across the full web development stack, using HTML, CSS (Bootstrap 5), JavaScript, and Vue.js for responsive front-end design, and Node.js, PHP, and Laravel for building RESTful APIs on the back end. I work with MySQL, Firebase, and follow OOP with TypeScript. I also use tools like Git, Postman, Jira, Figma, and deploy projects via Netlify, Vercel, and AWS while leveraging AI tools such as ChatGPT, Poe, and Grok to boost productivity.

In addition to technical knowledge, I also bring important soft skills such as teamwork, adaptability, and communication. These were emphasized throughout my education, where I was trained not only in technical subjects but also in how to succeed in a professional environment.

Joining **AEON Specialized Bank** is an exciting opportunity for me to apply my knowledge, contribute meaningfully to the team, and continue growing as a developer. I believe I have the potential to become a senior developer within two years and aspire to be a project lead within five. I'm a fast learner and effective communicator, which allows me to adapt quickly and collaborate well with others.

Sincerely,

Sreyneang Loeun

SREYNEANG LOEUN

JUNIOR BACK-END DEVELOPER
